This book has the potential to be a life changer for people with diabetes. It teaches Acceptance and Commitment Therapy (ACT) principles to help people with diabetes come to grips with all the emotions involved with living with diabetes. There's also a lot of good information about the condition itself. I highly recommend this book. I was already familiar with ACT before I read it, but the author does a fine job of teaching some basic ACT concepts. If you're a diabetic, please buy this book! Thank you.

Simply stated, every newly diagnosed diabetic should read and would substantially benefit from "The Diabetes Lifestyle Book" which is the collaborative work of clinical psychologist Jennifer A.

Gregg (Assistant Professor, Department of Psychology, San Jose State University, San Jose, California), Glenn M. Callaghan (Professor of Psychology, San Jose State University), and Steven C. Hayes (University of Nevada Foundation Professor of Psychology, University of Nevada, Reno). The life-style changes that a diabetes diagnosis compels is often daunting and very difficult to sustain until and unless the diabetics are able to face their fears, voice their concerns, and maintain the changes in their diets, activity levels, and medical services required for a long and healthy life. The psychology, the motivation, the mental management techniques that must go along with changes in diet, medication schedules, and exercise programs are fundamental and precisely the 'how to' information and inspiration provided by "The Diabetes Lifestyle Book". No personal diabetes reading list or community library Health & Medicine reference collection should be without a copy of "The Diabetes Lifestyle Book".

The author walks you through looking at how diabetes has affected your life and dreams, and encourages you to choose how you will live with diabetes. Not just food and exercise and medicine.

This is an excellent book. It is written in layman's term. Another word, it is very easy to read and understand. This book is kept simple. Nothing complicated. Keep it simple!:)
